

College Toulouse II-Le Mirail

IUT Blagnac

IT Department 2013-2014

- ACSI 14 GROUP :
 - Romain Daguet
 - Yoann Dandine
 - Youssef Darrab
 - Guillaume Robert*

Wiki Agile Project

Final infrastructure:

- **Programming language: Java**

We decided to use Java to easily make a graphical interface and to divide work

- Databases: addresses & bills

The model of the software is a list of addresses and bills (classes associated)

- DEPOSIT IN GIT SERVER: <https://github.com/Thaelz/prodif>

Sprint 0:

- Creation of the git server: Yoann DANDINE
 - Backlogs management: Youssef DARRAB
 - Hello World program: Guillaume ROBERT
- The goal of the Hello Word was to test a GIT deposit

Sprint 1:

We started by designing diagrams according to customer's needs. We started also the graphical interface

- UC Diagram: Youssef DARRAB
- Class Diagram: Romain DAGUET
- Graphical Interface: Guillaume ROBERT

Sprint 2:

We finished the interface and started to think about how to connect this to a model of data (really create a bill, control the model with controller methods...)

- Graphical interface ready: Guillaume ROBERT
- Controller code: Youssef DARRAB
- Model code : Yoann Dandine

Sprint 3:

- SNI: Guillaume ROBERT (Made from the graphical interface)
- DSS: Yoann DANDINE (Made to help the controller coding)
- DS: Romain DAGUET (Made to help the controller coding)
- Controller code: Youssef DARRAB
- Link all elements to make an usable software : Youssef DARRAB

Not done:

- Entry checkings
- Older bills
